DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on May 2, 2006 has been entered.

Allowable Subject Matter

Claims 1-11 are allowed in view of the prior art.

The following is an examiner's statement of reasons for allowance:

As to claims 1, 3, 5, and 7, the prior art of record, taken either alone or in combination, fails to disclose or render obvious a method for manufacturing thin film devices including, among other steps, the direction of white light onto an area of a thin film, the detection light reflected from the film when the film is at a predetermined position, the position being determined based on information from a position sensor and a rotation detector, the calculation of a spectral waveform of the detected light and correcting distortions in the waveform, the determination of thickness of the film based on information from the spectral waveform, and further for claims 3, 5, and 7, the monitoring of a polishing process by repeating the method for multiple locations on the thin film, in combination with the rest of the limitations of the above claims.

For more detailed reasoning, please see the applicants' arguments dated May 2, 2006 in response to the previous Office Action of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
